

Reversible In-line Patio Door Handle Set

For security this handle set should be fitted with the heads of the fixing screws to the inside of the door.

To reverse the handing of the handle:

- Unscrew the fixings on the back plates of the handles
- Turn the handle grips to the opposite hand
- Replace the fixings

When fixing the handles in position on the door take care not to over tighten the fixing screws - this can deform the edge of the door sash and cause difficulty in closing / locking.

For security this handle set should be fitted with the heads of the fixing screws to the inside of the door and the cylinder protection handle to the outside.
